I. Fingerprint Management

A. Factory mode:

Use any fingerprints to unlock the lock, and the blue indicator light on.

B. Register fingerprints:

1. APP connect with the lock. Please read "E. Connect smart lock" instruction.
2. Please wake up the lock. Then go to "User Management" to add fingerprints.
3. Click the "+" icon in the upper right corner of the interface (Fig. 15) to enter the add fingerprint interface (Fig. 16-17).
4. Please follow the voice prompt to input your fingerprints. Successfully add your fingerprints (Fig. 18).

C. Only use the fingerprint to unlock:

- Note:** In this case the Bluetooth APP function cannot be used. If you need to restore the Bluetooth APP function, please delete the administrator fingerprint. For specific methods, please refer to 'J. Resetting. 2'.
1. Only want to use fingerprint to unlock. Please follow the next steps to register your fingerprints. The 1st and 2nd fingerprints are administrators. The 3rd to 20th is general user fingerprints.
 - 1.1 Before APP setting, using your fingerprint to press and hold on fingerprint sensor for 8 seconds until the blue light is on. Then using the same fingerprint to press 5 times, and the green indicator light will flashes each time. Then register the administrator fingerprint successfully.
 - 1.2 If register the 3rd to 20th fingerprints, need the administrators fingerprint to press for 8 seconds until the blue light is always on, and then press the fingerprint for 5 times to register. The green light flashing indicates successfully register.

Fig. 19

—10—

C. Modify fingerprint:

Enter to modify the fingerprint name (Fig. 19), after inputting the fingerprint name, click "Modify", the modification is successful.

D. Delete fingerprint:

The icon "X" in the upper right corner deletes the fingerprint.

J. Resetting:

1. Reset the lock

Please click "Unbind smart lock" from admin's account (Fig. 10). All settings will be deleted. Restore factory settings.

2. Reset the fingerprint setting by deleting administrator fingerprint

Use the administrator's fingerprint to long press the fingerprint sensor until the blue light appears and turns to red. Lift the fingerprint and press it again. The green light appears. All fingerprints are successfully deleted and factory settings are restored. Then you can set the lock through the APP.
